

ROAR – Supercharger MDR161415DES -0

ROAR Supercharger

- ✓ NSW approved MDR 161415DES-0
- ✓ Industry's best warranty on superchargers
- ✓ Reduction in noise – min 85dB max 92dB
- ✓ Commercially viable upgrade
- ✓ Reduction in service downtime
- ✓ Visually inspect wear and tear
- ✓ Change drive spider (if required) in 1/4 hour
- ✓ Change out Supercharger (if required) in 1 hour
- ✓ Highest quality hydraulic components
- ✓ Soft start and cushioned stop
- ✓ Designed to protect engine from catastrophic failure
- ✓ Supercharger Patent No. 2015902451

Who We Are

About Us

Established in 2000 with one underground transporter and a tool bag by Craig Barnett, Cougar Mining Group has now grown to include two directors/shareholders (Craig Barnett & Chad Dillinger), a fleet of Underground Loaders, Driftrunners, Longwall Relocation Equipment and Auxiliary Fans plus a full array of underground attachments and support equipment.

Cougar has grown to a 4000m² undercover workshop surrounded by a hectare of concrete hard stand, focusing on maintenance and repairs, hire equipment, spare parts and field service.

Cougar prides themselves on their empowered employees working to a common goal to provide 1st class maintenance and services to the mining sector.

Fair and reasonable, passionate and local

ROAR - Supercharger Upgrade

Why the R.O.A.R.

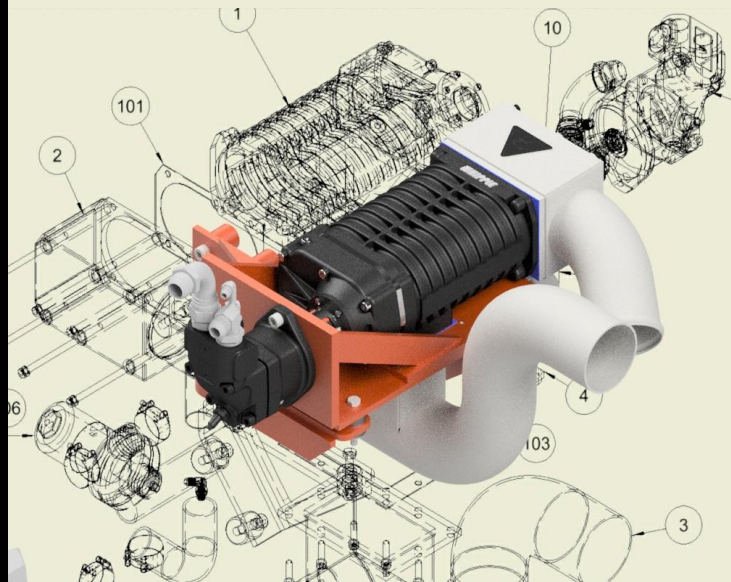

CMG own and operate a fleet of some 20 underground Jug-A-0 loaders. As one of Australia's largest fleet owner/operators there was a need to both extend service life and increase machine reliability. CMG's R&D Engineers looked at historical data from multiple sites using JUG-A-0's and focused on specific problem areas identified. After revision, trials and countless machine hours CMG have developed a solution to the reliability problems. We back our product and are willing to offer 4000hr warranty on supercharger drive couplings as a sign of our confidence.

Cougar currently has hire machines available fitted with the design registered supercharger upgrade.

The ROAR supercharger has shown better than expected field test results with no failures to date (4500+hrs at 1/6/2016), lower hydraulic temperatures, lower maintenance, less stress & strain on critical engine components, lower costs and an increase in reliability.

WARRANTY

- 4000hr warranty on couplings
- Six month warranty on superchargers, valves and coolers
- Manufacturer's warranty on all pumps and motors

At Cougar Mining Group (CMG) we have expanded and structured our business to ensure customer satisfaction is our number one priority.

With an expanded fleet to provide a package of equipment for projects along with an established workshop and field service teams, our focus is on delivering a quality service with quick turnarounds to optimize our customer productivity.

Cougar aim to provide quick response onsite support including onsite Code D's for Driftrunners, NDT and Gas Testing with their established field service team.

An established workshop ensures Cougar Mining is equipped to carry out post hire repairs, overhauls, Code D's, machining and fabrication.
